

Our Cloud based travel solution delivery platform.

Our solution is created for travel agencies and delivered as Software as a Service model (SaaS). A solution architected integrating latest cloud technologies and an end-to-end online travel solution that caters to all verticals of travel supply chain including suppliers, aggregators, consolidators, agents and corporates. A modular solution that enables our clients to pick and choose solutions they need and thus making it the most flexible and scalable solution available in the market today.
